TASK 4

Part A :- Professional Emails

Email 1: Extension request to professor

From: nishita.25bas10081@vitbhopal.ac.in

To: RaghavSharma.19bai10756@vitbhopal.ac.in

Subject: Request for Extension on Digital Literacy Assignment

Dear Professor Raghav Sharma,

I hope you are doing well. My name is Nishita, and I am a student in your Digital Literacy class, section B50, scheduled at 9:30.

I am writing to respectfully request a short extension for the assignment titled “Digital literacy Assignment,” currently due on 04-04-2026. Over the past few days, I have been facing “overlapping midterm examinations in multiple courses”, which has limited the time I can dedicate to completing the assignment to the standard you expect and I aim for.

I have already started working on the task and plan to submit quality work. If possible, I would be grateful for an extension until 08-04-2026. I understand if this cannot be accommodated, but I would sincerely appreciate your consideration.

Thank you for your time and understanding.

Sincerely,
Nishita

Vit Bhopal University

Email 2: Interest in summer internship

From: nishita.25bas10081@vitbhopal.ac.in

To: RaghavSharma.006@airbus.ac.in

Subject: Expression of Interest in Summer Internship

Dear Raghav Sharma,

I hope this message finds you well. My name is Nishita, and I am a first-year student pursuing a Bachelor's degree in Aerospace at VIT Bhopal University. I am writing to express my strong interest in a summer internship opportunity with Airbus.

I am particularly interested in your work in, "software development and AI-based solutions" and I admire how Airbus emphasizes "innovation and real-world impact for clients". Through my coursework and personal projects, I have gained foundational skills in Python programming, problem-solving, basic web development, Iot integration, drone technology and I am eager to apply and further develop these skills in a professional environment.

I would be grateful for the opportunity to contribute to your team, learn from experienced professionals, and understand industry best practices. I have attached my resume for your reference and would be happy to provide any additional information.

Thank you very much for considering my application. I look forward to the possibility of discussing how I can add value to your internship program.

Best regards,

Nishita

Part B – Social media checklist file content

5 Do's for responsible social media use

- Think carefully before you post anything that could affect your academic or professional image.
- Adjust your privacy settings to control who can see your content and personal information.
- Verify information from reliable sources before sharing news or opinions.
- Use social media to build a positive personal brand by sharing achievements, projects, and constructive ideas.
- Report and avoid abusive, bullying, or harmful content, and support peers who may be targeted.

5 Don'ts for responsible social media use

- Don't post content that is offensive, discriminatory, or could be seen as promoting illegal activities.
- Don't overshare sensitive details such as your location, college schedule, contact information, or financial data.
- Don't engage in online arguments or harassment, even if you disagree with someone strongly.
- Don't spread unverified rumors, screenshots, or private messages that violate others' trust.
- Don't use social media during class or study time in ways that distract you from your academic responsibilities.

100–150 words on poor digital communication

Poor digital communication can cause serious misunderstandings, especially when messages lack clarity or proper tone. A well-known example is when employees at a chemical plant misread and poorly documented shift handover notes about equipment status, leading to a toxic chemical leak at a DuPont facility in LaPorte in 2014. Critical information about ongoing issues was not clearly communicated or confirmed, and several workers lost their lives as a result. In this situation, the problem could have been reduced by using clear, standardized digital logs, confirming receipt of messages, and encouraging staff to ask follow-up questions rather than making assumptions.

Regular training on precise, professional written communication and the importance of documenting operational risks could also have helped prevent the incident.
