README

About Me

I am working toward becoming an aerospace engineer with long-term goals in astronautics and building impactful technology. Right now, my focus is on strengthening fundamentals in programming, engineering concepts, and digital tools. I prioritize execution, consistency, and learning by doing rather than passive study.

What I'm Working On

- IoT system design
- Sensor interfacing and data acquisition
- Embedded programming basics
- Git and version control

Goals

- Master core aerospace engineering concepts
- Build real-world technical projects
- Develop a strong and credible portfolio
- Prepare for global opportunities in aerospace

README

- Embedded programming basics
- Git and version control

Goals

- Master core aerospace engineering concepts
- Build real-world technical projects
- Develop a strong and credible portfolio
- Prepare for global opportunities in aerospace

Tools & Platforms

- GitHub
- LinkedIn
- ResearchGate

Current Focus

Becoming disciplined in execution, improving technical clarity, and building skills that translate into real outcomes.

About

A 19 year old from India who is first year aerospace engineering student and aspiring astronaut with deep passion for space exploration and relentless drive to push boundaries for human achievements.

I am Passionate about space exploration, astronautics, and interplanetary research. I have made my contributions in discovery of clouds in the atmosphere of Mars through NASA citizen science program and worked on projects like launching sugar rockets and building AI-powered robots.

I am driven to contribute to humanity's journey beyond Earth's boundaries, with the ultimate goal of becoming the first person to set foot on Mars. Through rigorous training, continuous learning, and collaboration with leading experts in space exploration, I am committed to pioneering a new era of interplanetary exploration and discovery.

Beyond academics, I also enjoy swimming, trekking, sketching, writing and public speaking—activities that fuel my creativity, resilience, and confidence.

let's connect to work on something very interesting and exciting

Featured

Media

Engineering Mathematics, Engineering Physics, Introduction to Aerospace Engineering, Engineering chemistry, Python, AI/ML

INTERESTS:
Spacecraft systems and design.
Planetary science.
Satellite data and remote sensing.
Space mission operations.

TECHNICAL PROJECTS:

1)Sugar Rocket Development (2021)
Designed and launched solid propellant rockets using sucrose and potassium nitrate
Studied propulsion stability and safety considerations.
Achieved recognition for launching a sugar rocket at age 14
2)Autonomous Line-Following Serving Robot (Astra) (2022)
Developed Arduino-based robot using IR sensors for path detection and navigation
