Check Tutorial tab to know how to to solve.

Task

The provided code stub reads an integer, n, from STDIN. For all non-negative integers $i < n$, print i^2.

Example

$n = 3$

The list of non-negative integers that are less than $n = 3$ is $[0, 1, 2]$.

Print the square of each number on a separate line.

```
0
1
4
```

Input Format

The first and only line contains the integer, n.

Constraints

$1 \leq n \leq 20$

Output Format

Print n lines, one corresponding to each i.

Sample Input 0

Change Theme | Language | Pypy 3

```python
if __name__ == '__main__':
    n = int(input())

    # We use a for loop to go from 0 up to (but not including) n
    for i in range(n):
        # We print the square of i
        print(i**2)
```

Line: 7 Col: 20

Digital Literacy: Quick Check Quiz

This short quiz is designed to help us understand the basics of staying safe and working efficiently online. As part of our Digital Ambassador initiative, we want to ensure every student is confident with online security, cloud collaboration, and data privacy.
Please take 2 minutes to answer these 5 simple questions. Your participation helps us build a more tech-savvy and secure campus community!

Which of these is the safest way to store a backup of your important college assignments? *

- ○ Only keeping them in your computer's 'Downloads' folder.
- ○ Saving them to a cloud service like Google Drive or OneDrive.
- ○ Sending them to yourself as a text message.
- ○ Deleting them once you have submitted them once.

Which of the following are signs that a website might not be secure? (Select all that apply) *

- ☐ The URL starts with http:// instead of https://.
- ☐ There are many aggressive pop-up ads.
- ☐ The website asks for your credit card to "verify your age."
- ☐ The website has a "Contact Us" page with a real address.

Why should you always "Sign Out" or "Log Out" of your accounts when using a computer in the college library or lab? *

Your answer

Why should you always "Sign Out" or "Log Out" of your accounts when using a computer in the college library or lab? *

Your answer

If you are collaborating on a group project, what is the main benefit of using a "Shared Folder" in Google Drive? *

- It makes the files private so no one can see them.
- Everyone can work on the latest version of the file at the same time.
- It automatically deletes old versions of your work.
- It prevents your teammates from editing your work.

How often do you update your laptop or phone's software when a "System Update" notification appears? *

	1	2	3	4	5	
I always ignore it	○	○	○	○	○	I install it immediately

Why should you always "Sign Out" or "Log Out" of your accounts when using a computer in the college library or lab?

5 responses

You should always log out to prevent the next user from accessing your personal data. Public browsers often stay "signed in" even after you close the window, which could allow someone else to read your emails, change your passwords, or delete your assignments.

Logging out protects your accounts from the next user, who could access your email, grades, or files on shared college computers.Sessions often linger in browsers or apps, risking data theft, unauthorized posts, or privacy breaches until you explicitly sign out.

Always sign out from college library/lab computers to prevent the next user from accessing your accounts, emails, grades, or personal data.Shared sessions persist even after closing browsers, risking unauthorized actions like data theft or impersonation.

You should sign out to prevent others from accessing your private information, such as emails, assignments, or saved passwords. Since public browsers often stay signed in even after closing the window, logging out ensures your accounts remain secure.

If you are collaborating on a group project, what is the main benefit of using a "Shared Folder" in Google Drive?
